

Position Title

Research Physical Scientist, AST, Climate & Radiation Studies

Organization

6110 / GODDARD INSTITUTE FOR SPACE STUDIES

NASA Announcement Number

GS12D0010

Vacancy Type

Case File

OPM Control Number / Status

315951400 / Posted

Salary Range

\$128,241 - \$155,500

Job has closed

Open Dates

05/04/2012 - 05/10/2012

Pay Plan - Series / Grade (Low, Potential)

GS - 1301 / 15, 15

Position Information

Full-Time / Permanent

Duty Location

364170061 - New York, NY (1)

Who May Be Considered

This announcement is open to all qualified U.S. citizens.

Citizenship Required

True

Job Summary

The Sciences and Exploration Directorate, Earth Sciences Division, Goddard Institute for Space Studies, (Code 611) seeks a highly skilled individual to serve as a Research Physical Scientist. You will perform research in the development, evaluation, and application of large-scale climate models. This involves advanced theoretical research in the fields of ocean dynamics, atmospheric physics, meteorology, and climate dynamics.

Comments

Please be sure to review your resume on the Resume Review page once you have transferred to the NASA site. Ensure that the correct copy of the resume you have selected has been transferred from your USAJOBS account. If you fail to validate the information in your resume, you may not be appropriately evaluated for this position. Also, please be sure to review and complete the Supplemental Information questions.

To receive consideration, you must submit a resume and answer NASA-specific questions. The NASA questions appear after you submit your resume and are transferred to the NASA web site. If you successfully apply, USAJOBS will show your application status as 'resume received - complete.' If your status is 'Application Started,' you have not successfully applied. Do not rely on a USAJOBS email to confirm successful application only an email from NASA confirms a successful application.

To receive consideration, your resume **MUST** contain your complete degree information (i.e., type of degree received, year degree received, and major area of study). If you have received a degree in Computer Science, you **MUST** list all courses you have taken which meet the education requirements as stated in the qualification requirements section as well as the semester hours awarded. You **MUST** include the descriptive title, course code, and number of semester/quarter hours. (i.e., CMSC-435-Software Engineering, 3 Semester hours) If this information is not provided, your education may not be appropriately evaluated and you may lose consideration for this position. Please note that degrees in engineering technology are not considered to be qualifying for this position. If you are selected for this position, you will have to provide an official copy of your transcripts prior to entering on duty.

If you are an individual with a disability and have questions regarding the Federal special hiring authorities for individuals with disabilities or would like to request a reasonable accommodation for the application or hiring process, please contact the Disability Program Manager by email at gsfc-disability-programs@mail.nasa.gov. Goddard Space Flight Center offers a wide array of reasonable accommodations and programs for individuals with disabilities including onsite sign language interpreters, readers, and is a participating agency with the Computer Electronics Accommodations Program.

(NOTE: For additional information for job seekers with disabilities, please click on the following website, <https://www.opm.gov/disability/PeopleWithDisabilities.asp>)

Marketing Summary

If you're looking for an exciting career in the sciences, NASA is looking for you. NASA scientists have unparalleled opportunities to shape the future through research, discovery, and innovation. We boldly expand frontiers in air and space to serve America and to benefit the quality of life on Earth. As an added benefit, you will be joining an agency ranked as one of the best places in the Federal government to work.

Key Requirements

1. A one-year probationary period may be required
2. Applicants must possess at least a Bachelor's Degree or equivalent
3. Occasional travel may be required
- 4.
- 5.

Total number of openings

No total openings data

Major Duties

As an Aerospace Technologist, (AST), specializing in Climate and Radiation Studies, you will serve as a Research Physical Scientist at the Goddard Institute for Space Studies (GISS) in New York City. You will perform research in the development, evaluation, and application of large-scale climate models. This involves advanced theoretical research in the fields of ocean dynamics, atmospheric physics, meteorology, and climate dynamics. The work specifically involves researching and studying climate and the mechanisms by which the different levels of the Earth's atmosphere are coupled. This research is used to predict the distribution of solar and infrared radiative fluxes, to interpret the relevance of these distributions to climate variations, or to understand the role played by atmospheric temperature, sea surface temperatures, clouds, aerosols, and optically active trace constituents. This is a research position. Research includes, but is not limited to empirical and theoretical investigations to understand the causes and consequences of natural and human-made climate change. Specifically, to develop the tools, including global climate models, that allow analysis of climate change and projections of future climate change as a consequence of alternative scenarios for climate forcing factors. You will lead the modeling development efforts at GISS. You will determine the area of research and plan of attack in addressing priority agency issues and ensure the team achieves a significant rate of progress in completing program projects. You will develop and implement organization-wide data analysis procedures, tools, and activities.

General Qualifications

In addition to the Basic Education Requirement, applicants must have one year of specialized experience equivalent to the next lower grade, which has equipped the applicant with the particular competencies needed to successfully perform the duties of the position described above.

Specialized experience is defined as performing research in oceanography, paleoclimatology, and atmospheric dynamics; developing and applying large-scale general circulation models; and using paleoproxy data to assess accuracy of climate models.

Educational Qualifications

Basic Education Requirement: A bachelor's degree from an accredited college or university with major study in Aeronautical Engineering, Aeronautics, Aerospace Engineering, Astronautical Engineering, Astronautics, Astronomy, Astrophysics, Biomedical Engineering, Ceramic Engineering, Ceramics, Chemical Engineering, Chemistry, Civil Engineering, Computer Engineering, Computer Science*, Earth and Planetary Science, Electrical Engineering, Electronics Engineering, Geology, Geophysics, Industrial Engineering, Materials Engineering, Materials Science, Mathematics (Pure or Applied), Applied Mechanics, Engineering Mechanics, Mechanical Engineering, Metallurgical Engineering, Metallurgy, Meteorology, Nuclear Engineering, Nuclear Engineering Physics, Oceanography, Optical Engineering, Physics, Applied Physics, Engineering Physics, Space Science, Structural Engineering, Welding Engineering or other appropriate physical science or engineering field. Degrees in engineering technology are not considered to be qualifying for this position. *Note: Curriculum must include 30 semester hours of course work in a combination of mathematics, statistics and computer science. Of the 30 semester hours, 15 must be in any combination of statistics and mathematics which includes differential and integral calculus.

Requirements

U.S. citizenship is required.

How You Will Be Evaluated

NASA uses an automated system (Resumix) that matches the competencies extracted from your resume to the competencies identified by the selecting official for the position. Based on the competencies you match, you are placed in one of three categories identified as 90, 80, or 70 pt. quality categories, which are defined as:

90 pt. Category - Tentatively meets (until subsequent confirmation upon referral) the basic qualification requirements identified in the vacancy announcement and has experience in the same or similar job that has demonstrated superior proficiency in the primary requirements of the position.

80 pt. Category - Tentatively meets (until subsequent confirmation upon referral) the basic qualification requirements identified in the vacancy announcement and demonstrates satisfactory proficiency in the primary requirements of the position.

70 pt. Category - Fails to meet criteria described in the 80 pt. category.

Additional application guidance is available in NASA's *Applicant Guide* (https://resume.nasa.gov/applicant_guide.html).

Information for Veterans: The Category Rating Process protects the rights of veterans by placing them ahead of non-preference eligibles within each category. Preference eligibles who meet qualification requirements and have a compensable service-connected disability of at least 10 percent must be listed at the top of the highest quality category, except when the position being filled is scientific or professional at the GS-09 grade level or higher.

For the purpose of the Career Transition Assistance Program (CTAP) and the Interagency Career Transition Assistance Program (ICTAP), candidates rated in the top quality category are considered well-qualified.

Benefits

NASA offers excellent benefit programs and competitive salaries. To learn more about pay and benefits at NASA, click *HERE* (<http://nasajobs.nasa.gov/benefits/benefits.htm> target=_blank).

Other Information

Any applicant tentatively selected for this position may be required to undergo a pre-employment background investigation.

Individuals who have special priority selection rights under the Agency Career Transition Assistance Program (CTAP) or the Interagency Career Transition Assistance Program (ICTAP) must be well qualified for the position to receive consideration for special priority selection. See 'How You Will Be Evaluated' for definition of well qualified.

Federal employees seeking CTAP/ICTAP consideration must indicate their eligibility when applying for a position. The USAJOBS resume asks you to identify your ICTAP eligibility; the NASA Supplemental Information asks you to identify your CTAP eligibility. If you are selected for the position, you must be prepared to submit proof that you meet the requirements for CTAP/ICTAP. This includes a copy of the agency notice, a copy of their most recent Performance Rating and a copy of their most recent SF-50 noting current position, grade level, and duty location.

As a condition of employment, male applicants born after December 31, 1959, must certify that they have registered with the Selective Service System, or are exempt from having to do so under the Selective Service Law.

In order to receive preference in hiring, you must clearly identify your claim for veterans preference on your resume.

U.S. citizenship is required.

NASA's [Applicant Guide](https://resume.nasa.gov/applicant_guide.html) provides the information needed to assist you in determining whether or not you can claim 5 or 10 point veterans preference. You should not submit documents to prove your eligibility for veterans preference at this time. However, you must be prepared to submit proof of veterans preference (DD-214, and, if claiming 10-point preference, SF-15 plus proof required by that form) as requested by the Human Resources Office. Veterans preference will only be considered based on what is supported. For instance, if you claim 10-point preference, but are only able to document 5-point preference, you will be considered accordingly. If you fail to provide the required documents within the stated time period, we may withdraw a job offer and/or remove you from further consideration.

Your USAJOBS account asks you to assign a name to each of your resumes. When you apply to a NASA position, we will show you the text of the resume you have submitted, but we do not maintain the name you have assigned to that resume. If you wish to keep track of that information, we recommend you make note of it at the time you apply.

Travel and relocation expenses are not authorized.

Occasional travel may be required.

How to Apply

This vacancy is being filled through NASA STARS, an automated Staffing and Recruitment System. NASA partners with USAJOBS in providing a seamless application process. Before you begin the application process, please read the vacancy announcement carefully and have all required information available. You may begin the process of submitting your resume by clicking on the 'Apply Online' link.

In order to be considered, you must submit a resume completed on the USAJOBS site. When completing your USAJOBS resume, please remember that NASA limits resumes to the equivalent of approximately SIX typed pages, or approximately 22,000 characters including spaces. You will NOT be allowed to complete the application process if your resume is too long or if your resume was uploaded to USAJobs from a second source. Additionally, NASA does not accept documents attached through USAJobs' document attachment feature.

Once you submit your resume to NASA, you will be asked to complete a short series of additional questions. You must finish the entire process in order to have a complete application package and receive consideration. Your answers will not be saved unless you finish the entire application.

You may edit a previously-submitted application, if the announcement is still open. For more information, see the *Applicant Guide*. (https://resume.nasa.gov/applicant_guide.html target=_blank)

If you are unable to apply electronically for this position, submit your resume and supplemental questions to: National Aeronautics and Space Administration (NASA), Resume Operations Center, Mailstop: HS50, Marshall Space Flight Center, AL 35812. DO NOT submit your resume directly to the Center advertising this vacancy. Mailed resumes must be received by the close of business on the closing date of the announcement. Hard copy resumes requirements are provided at: *Hard Copy Resume Requirements* (<http://nasajobs.nasa.gov/howtoapply/hardcopyresumes.htm> target=_blank).

If you are a first time applicant, we recommend that you review NASA's *Applicant Guide* (https://resume.nasa.gov/applicant_guide.html target=_blank) to ensure that you are providing a complete resume. Failure to submit the supplemental data and a resume that contains all of the required information may result in loss of consideration for positions in which you are interested.

All applications must be received no later than midnight Eastern Time on the closing date of the announcement.

Required Documents

NASA's application process has been specifically developed to ensure that we only ask you for the information we absolutely need to evaluate your qualifications and eligibility. In order to apply for this position, you only need to submit your resume and answer the screening questions and supplemental information. No additional documentation is accepted at the time of application. (For example you need not submit narrative 'KSA' statements; they are not required and will not be evaluated.) In this way we allow you to focus on preparing a resume that best describes your background and abilities. For assistance in preparing your resume, consult the *Applicant Guide* (https://resume.nasa.gov/applicant_guide.html *target=_blank*).

Nothing further is required until requested by the Human Resources Office. At that point, we may ask you to submit documentation to support statements made in your resume. For example, we may ask you to provide academic transcripts or proof of Federal employment status. If you are claiming veterans' preference, we may ask you to submit proof of veterans preference (DD-214, and, if claiming 10-point preference, SF-15 plus proof required by that form). If you fail to provide the required documents within the stated time period, we may withdraw a job offer and/or remove you from further consideration.

What to Expect Next

Candidates for NASA positions are evaluated using our automated staffing and recruitment system, NASA STARS, which compares your skills and experience as described in your resume with the requirements of the position. If you are found to be a highly qualified candidate, you will be referred to the selecting official for further consideration. (In some cases, individuals with priority for special consideration must be considered and selected before other candidates.) Whether or not you are contacted for an interview depends upon the location of the position and the judgment of the selecting official.

At NASA, we pride ourselves on efficient and timely recruitment actions, and you can normally expect to learn the outcome of the selection process in a fairly short period of time. In addition, to ensure that you can measure progress for yourself, NASA provides you with regularly updated information on the status of the vacancy announcement.
